PROFESSIONAL SUMMARY

Detail-oriented Quality Assurance Engineer with hands-on experience in manual and automated testing of web applications and APIs. Provides dedicated QA support for a Testing-as-a-Service (TaaS) client: maintains a 95+ script daily regression suite, has automated 700+ test cases, performs Root Cause Analysis (RCA) on every failure, and escalates critical defects for same-day fixes. Experienced with Agile/Scrum teams, QA documentation, and release validation. Also skilled in AI-assisted web development and UI/UX design using Figma.

WORK EXPERIENCE

AutomationHQ **May 2025 – Present**
Quality Assurance Engineer *Remote*

- Provide dedicated QA support for a TaaS client: monitor a 95+ script daily regression suite, investigate every failure through RCA, and report system issues to the client right away.
- Handled 890+ test cases across 3 ERP suites, with 700+ automated using AHQ's No-Code Automation Platform; automated a 13-case Excel Upload flow into a single 472-step script.
- Rebuilt outdated Late Fees coverage through exploratory testing, growing it to 82 automation-ready test cases (positive, negative, and edge), and reported defects with clear reproduction steps.
- Maintain 4,455 locators as the application changes and optimize scripts (smart waits, tighter steps) to remove intermittent failures and reduce execution time.
- Validate the client's daily workflow on the AHQ platform (TestBots, scheduler, grids, test and email reports, user roles, retry) and escalate critical (P0) defects for same-day fixes with Dev and hotfix deployments with DevOps.
- Deploy the client's ephemeral environment (Terraform) weekly through GitHub Actions and validate it with a smoke-test bot.
- Coordinate with the client on new modules and enhancements, lead release validation, maintain QA documentation (test cases, Run Book, RCA tracker), and run application demos and QA learning sessions within an Agile/Scrum team.

AutomationHQ **January 2025 – May 2025**
Quality Assurance Intern *Remote*

- Performed regression, UI, API, functional, and exploratory testing across multiple environments.
- Created and maintained test scripts, and logged and tracked bug tickets through to resolution.
- Collaborated with marketing and design teams, using Figma for UI-related QA tasks.

Freelance Web Developer **February 2025 – May 2025**
Self-employed *Remote*

- Built capstone and academic web systems with AI-assisted tools (Cursor AI) using HTML, CSS, JavaScript, PHP, and MySQL.
- Designed responsive UI/UX and supported deployment, testing, and iterative improvements.

EDUCATION

Bulacan State University **Malolos, Bulacan**
Bachelor of Industrial Technology, Major in Computer Technology — Dean's Lister *August 2020 – July 2025*

SKILLS

Quality Assurance: Manual & Automation Testing (AHQ) | Regression, Smoke, Sanity, Functional, End-to-End, Exploratory, UI & API Testing | Test Case Design | Defect Reporting & RCA | QA Documentation | UAT Support

Automation & Deployment: Test Script Creation, Execution, Monitoring & Maintenance | GitHub & Basic Git Workflow | GitHub Actions | Ephemeral Environment Deployment (Terraform) | Staging Deployment & Verification

Methodologies: Agile | Scrum | SDLC | STLC

Development & Tools: AI-Assisted Web Development (HTML, CSS, JavaScript, PHP, MySQL) | AI-Assisted Rapid Prototyping | Figma (UI/UX) | Cursor AI | Claude | Microsoft Word & Excel

Soft Skills: Adaptability | Teamwork | Communication | Problem Solving

AWARDS & CERTIFICATIONS

QA Internship Certificate of Completion – AutomationHQ (2025) | Certificate of Excellence – PC Building & Troubleshooting, Bulacan Tech Expo (2023) | Associate Director for Communication (2022) and Director for Logistics (2023), SPICE-CIT | Introduction to SQL – Sololearn (2023)
